Continuation of 11, does NOT place the application in condition for allowance because: The examiner respectfully disagrees with applicant arguments.

Applicant argues on page 2-3 of the remark regarding user selecting a buffer time; input unit operated by the user for selecting a buffer time; and control unit for temporarily storing a video signal in a selected allocated buffer time corresponding to the buffer time selected by user.....".

In response the examiner respectfully disagrees. Sparell et al. discloses under the direction of the user interface to control buffer appropriate size for recording. When a user starting watching video the recording device establish the buffer time after recognize the size of video data. Basically the recording device predetermined set a recoding size or buffer time after recognize the size of video data. Input means, the user interface is responsible for allowing the user to direct the operation (paragraph 0026 in addition the cited paragraphs of the final office action); and buffer memory or temporary memory and long-time memory as disclosed in (paragraph 0031). Therefore applicant argument regarding claim 1-16 the examiner maintains that Sparell et al. adequately provides support for the claimed limitation as mentioned above in addition the final office action. . .
